Activity Sheet in

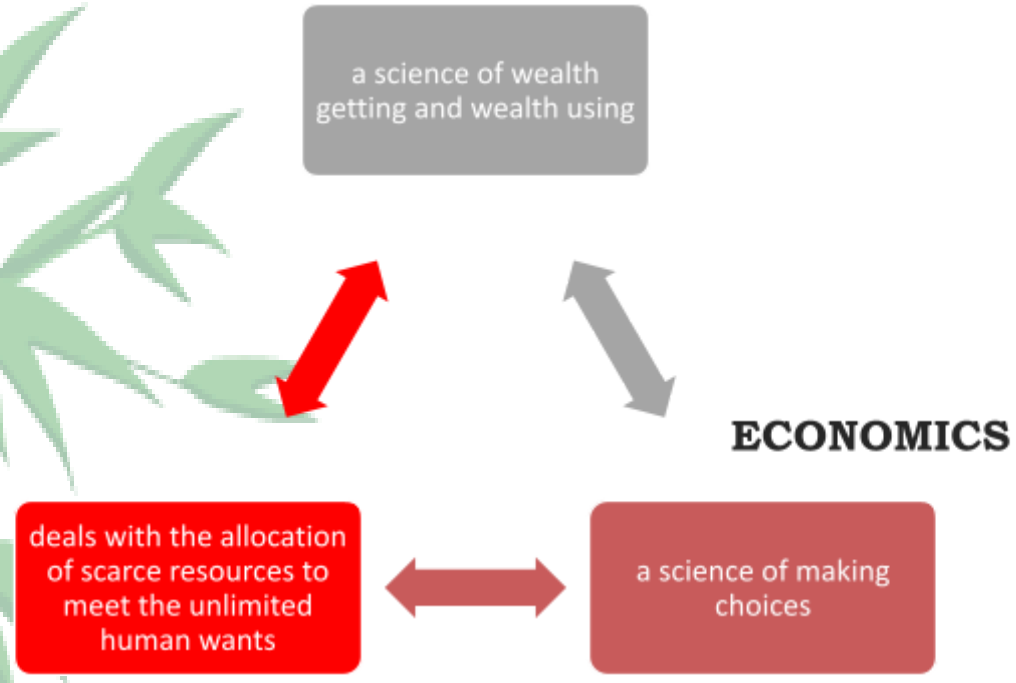
Applied Economics

Quarter 1 – Module 1: Differentiate Economics as social science and Applied science in terms of nature and scope. (ABM_AE12-Ia-d-1)

LET US REVIEW

When we say Economics, what are the words that come into your mind? Write those words inside the boxes.

LET US STUDY



Economics comes from the Greek word "oikonomia" which means "management of household.

Economics as a Social Science

Economics is primarily a Social Science. As a science it utilizes the scientific method of inquiry from identifying the problem, proposing alternative tentative answers or hypothesis, testing the tentative answers to the question or the problem at hand, gathering and treating data, and answering the question through conclusion. This systematic or scientific method is being used in the study of society and its components. This, Social Science can be described as the study of the various modes and aspects of human interactions in a group as these people aspire to preserve their group as a social unit, make it stable and promote its growth, expansion and development. As a Social Science, economics pertains to the study on how society creates its material wealth, how it makes this wealth available to its people with minimum difficulties, and how it expands its wealth.

Economics as an Applied Science

The term " applied economics" is believed to have started 200 years ago in the writings of two economists:

Applied Economics is the study of economics in relation to real world situations. It is the application of economic principles and theories to real situations and trying to predict what outcomes might be. In simpler definition, it is the study of observing how theories work in practice.

What is the importance of Applied Economics application?		
1. Applying Economics to company, household or a country helps sweep aside all attempts to dress up a situation so that it will appear worse or better than it is. It is a powerful tool to reveal the true and complete	2. Applied economics acts as a mechanism to determine what steps can reasonably be taken to improve current economic situation.	3. Applied economics can teach valuable lessons on how to avoid the recurrence of a negative situation, or at

situation in order to come up with things to do.		least minimize the impact

Definition of Economics-

LET US REMEMBER

Economics is regarded as a **social science** because it uses **scientific** methods to build theories that can help explain the behavior of individuals, groups and organizations. **Economics** attempts to explain **economic** behavior, which arises when scarce resources are exchanged. Where **economics** takes a look at theories and the history of these theories in general terms, **applied economics** helps companies, businesses and entire governments evaluate risks to take the proper measures to ensure stability based on numbers and trends.

LET US APPRECIATE (Written Works)

This part is considered as the valuing part where learners will draw their own reasoning ability which primarily in Higher Order Thinking (HOT). It can be presented in a situational activity.

What is the significance of studying economics? Having the knowledge of the country's economic situation, how will it help you improved your life and the economy as a whole?

(Written Works)
