Week 7: Module 9

GOVERNMENT PROPERTY
NOT FOR SALE

Business Mathematics

Week 7: Module 9

Target

Now that you know about markup, markdown, and markup cancellation, let us study profit or loss. *Profit* is what remains of the selling price (sales) after all costs and expenses had been deducted. *Cost* means the cost of the product sold or service rendered. *Expenses* refer to operating expenses and financial expenses. *Loss* occurs when the cost and expenses exceed the selling price sales.

After going through this learning material, you are expected to differentiate profit from loss(**ABM_BM11BS-Ii-6**).

PROFIT OR LOSS

What I Know

Choose the letter of the best answer. Write your answer on a separate sheet.

1. It is the money earned after the cost price is accounted for after the sale of a commodity.
   A. Cost Price B. Loss C. Profit D. Selling Price
2. It is the price at which the commodity is sold per unit.
   A. Cost Price B. Loss C. Profit D. Selling Price
3. Which of the following is the price that has to be spent to produce goods or services before any profit is added?
   A. Cost Price B. Loss C. Profit D. Selling Price
4. If the price that a company or store has to pay for the goods it is going to sell
   A. Cost Price B. Loss C. Profit D. Selling Price
5. Which of the following occurs when the cost of expenses exceeds the selling price?
   A. Cost Price B. Loss C. Profit D. Selling Price
6. Michael buys a clock for Php75 and sells it for Php100. What is his gain percent?
   A. 20% B. 25% C. 33 ½% D. 37 ½%
7. Divine made a profit of 25% when selling a dress at Php4,000. Find the cost price of the dress.
   A. Php2,700 B. Php3,000 C. Php3,200 D. Php3,650
8. A cloth merchant bought 35 shirts, each at a price of Php280. He sold each of them for Php308. Find his percentage profit.
   A. 5% B. 10% C. 12% D. 16%
9. A retail fruit vendor buys pineapples at a score for Php200, and retails them at a dozen for Php156. Did he gain or lose in the transaction and what percent was his gain or lose? (Note: 1 score = 20)
   A. 10% B. 20% C. 30% D. 40%

10. A man sold a fan for Php465. Find the cost price if he incurred a loss of 7%.
    A. Php400 B. Php432.45 C. Php500 D. Php532.45

Terms to consider:

• ***Cost Price*** – the price that a company or store has to pay for the goods it is going to sell

- the price that has to be spent to produce goods or services before any profit is added

•***Selling Price*** – the price at which the commodity is sold per unit

•***Profit*** – money earned after the cost price is accounted for after the sale of a commodity

Profit = selling price – cost price

selling price = Profit – cost price

cost price = selling price - Profit

•***Loss*** – occurs when the cost of expenses exceeds the selling price

Loss = cost price – selling price

cost price = Loss – selling price

selling price = cost price - Loss

ALTERNATE RESPONSE: Determine whether the statement shows a profit or loss situation. Write P for profit and L for loss. Write your answers on the space before the number.

____ 1. Ben bought a pen at Php10 each and sold it for Php12.

____ 2. Maria bought a scientific calculator at Php2,000. When a new and upgraded model was released after two months, she sold her scientific calculator for Php1,200 to buy the new one.

____ 3. A banana cue vendor gains Php100 for selling it at Php10 per stick.

____ 4. The cost of 10 pieces personalized calendar is Php850. It was sold Php150 each.

____ 5. Joy bought a 16GB memory card at Php600 and decided to sell it to her sister for Php650.

Business Mathematics

Week 7: Module 10

Target

Now that you know the difference between profit and loss, let us study how to obtain profit and to avoid loss in different transactions. Determining the profit or loss involves simple addition and subtraction. The revenue is a plus item. All expenses are minus items and, therefore, deducted from the revenue. The result is a profit if it is positive and a loss if it is negative.

After going through this learning material, you are expected to illustrate how profit is obtained and how to avoid loss in a given transaction (**ABM_BM11BS-Ii-7**).

PROFIT OR LOSS

What I Know

Choose the letter of the best answer. Write your answer on a separate sheet.

1. Which of the following is the price that a company or store has to pay for the goods it is going to sell?
   A. Cost Price B. Loss C. Profit D. Selling Price
2. This occurs when the cost of expenses exceeds the selling price.
   A. Cost Price B. Loss C. Profit D. Selling Price
3. A camera shop sold a camera for Php54,000 gaining 1/8 of its cost price. Find the cost price of the camera.
   A. Php 4,320 B. Php 6,750 C. Php 43,200 D. Php 47,250
4. Alma buys an old scooter for Php4,700 and spends Php800 on its repairs. If she sells the scooter for Php5,800, what is her gain percent?
   A. 4 4/7% B. 5 5/11% C. 10% D. 12%
5. If the selling price is doubled, the profit triples. Find the profit percent.
   A. 66 2/3 B. 100 C. 105 1/3 D. 120
6. A vendor bought candies at 6 for a peso. How many for a peso must he sell to gain 20%?
   A. 3 B. 4 C. 5 D. 6
7. A merchandiser expects a gain of 22.5% on his cost price. If in a week, his sale was Php392, what was his profit?
   A. Php18.20 B. Php70 C. Php72 D. Php88.25
8. A man buys a cycle for Php1,400 and sells it at a loss of 15%. What is the selling price?
   A. Php1,090 B. Php1,160 C. Php1,190 D. Php1,202

9. When a plot is sold for Php18,700, the owner loses 15%. At what price must that plot be sold in order to gain 15%?

   A. Php21,000 B. Php22,500 C. Php25,300 D. Php25,800

10. There are 100 oranges bought at the rate of Php350 and sold at the rate of Php48 per dozen. The percentage of profit or loss is:

   A. 14 2/7% gain B. 15% gain C. 14 2/7% loss D. 15% loss

Jumpstart

Direction: Read and analyze the word problem carefully. Then, solve for what is asked. Show your complete solution.

1. You bought a bag for ₱800. You spent ₱50 for transportation in going to the store to buy it. For the following independent cases, determine whether you earn a profit or incurred a loss. Determine how much you profit or loss was.

a. You sold the bag to your friend for ₱1000.

b. You sold the bag to your friend for ₱700.

Discover

Terms to consider:

• The ***cost of the sales*** is the purchase price and other expenses incurred in buying the products that the business has to sell including the freight-in or transportation of the goods it buys for resale.

• ***Operating expenses*** are expenses incurred to run the business like rent, supplies, utilities, etc.

• Other expense includes interest expense or finance charges which financial institutions charge firms for its service.

• ***Selling Price*** – the price at which the commodity is sold per unit.

• Other income includes interest income and other incidental income the firm earns like rent income if it has a property that it rents out.

• The ***gross profit*** is at times referred to as gross margin. It is net sales minus cost of sales.

• ***Operating profit/loss*** is gross profit less operating expenses.

• ***Net profit/loss*** is operating profit plus other income less other expense.

• **Gross sales** refer to the total sales.

Examples:

1.

Selling price	**₱25,000**
Expenses:	
Cost of sale/price	₱5,000
Operating expense	₱7,000
Net Profit	**₱ 13,000**

2. A man buys a sack of mango for ₱250 and sells it for ₱320. Find his profit or loss.

Solution:
Given:
Cost Price = ₱250 and Selling Price = ₱320

selling price – cost price = profit/loss

320 – 250 = 70

Profit = ₱70

Therefore, the profit is ₱70

3. A vendor bought 10 kilograms of tomatoes for ₱30 per kilogram but because of the pandemic the vendor needs to decrease the price from ₱30 to ₱25 in order to sell all of his tomatoes. Find his profit or loss.

Solution:

Given:

Cost Price = ₱30 x 10 kilograms

Selling Price = ₱25 x 10 kilograms

selling price – cost price = profit/loss

25(10) – 30(10) = 250 - 300 = -50

Loss = ₱50

Therefore, the loss is ₱50.

BUSINESS MATH QUARTER 3

Most Essential Learning Competencies	Output To Be Submitted	Date of Completion
Quarter III Week 1 ***2 Fractions/ decimals and percentage*** **February 21-25, 2022** ✓ Give real-life situations to illustrate fractions, decimals, and percent (ABM_BM11FO-Ic-4) ✓ Solve problems involving fractions, decimals and percent (ABM_BM11FO-Id-5)	**Worksheet for Week 1 -2 (Reference: Activity Sheet Quarter III)** Instructions: Answer the following activities. Module 1-2 . Gauge. Activity 8. Convert Me! (A, B, C, D, E, F) o Write all your answers on yellow paper. o Write the activity title o Write the quarter number and week number on the top right side of the paper.	**March 3, 2022**
Quarter III Week 3 – ***Key Concepts of Ratio and Proportion*** **February 28 – March 4, 2022** ✓ Identify the different kinds of proportions and write examples of real-life situations for each	**Worksheet for Week 3 (Reference: Activity Sheet Quarter III)** Instructions: Answer the following activities. Module 3. Explore. Activity 1. #s 1-5	**March 7, 2022**
Quarter III Week 4 ***– Key Concepts of Ratio and Proportion*** **March 7-11, 2022** ✓ Solve problems involving direct, inverse and partitive proportion (ABM_BM11RP-If-4)	**Worksheet for Week 4 (Reference: Activity Sheet Quarter III)** Instructions: Answer the following activities. Module 4. Gauge #s 1-15	**March 14, 2022**
Quarter III Week 5 ***Key Concepts of Buying and Selling*** **March 14-18, 2022** ✓ Differentiate Mark-on, Mark-down, and Mark-up obtain Mark-on, Mark-down and Mark-up of a product (ABM_BM11BS-Ig-1)	**Worksheet for Week 5 (Reference: Activity Sheet Quarter III)** Instructions: Answer the following activities. Module 5a. Explore. Activity 1. Can You Tell? #s 1-10 Module 5b, Explore. Activity 1. Complete Me! Letters – A, B, C	**March 21, 2022**
Quarter III Week 6 ***Key Concepts of Buying and Selling*** **March 21-25, 2022** ✓ Differentiate Mark-up from margins (ABM_BM11BS-Ih-3) ✓ Describe how gross margins is used in sales (ABM_BM11BS-Ih-4) ✓ Compute single trade discounts and discount series	**Worksheet for Week 6 (Reference: Activity Sheet Quarter III)** Instructions: Answer the following activities Module 6. Gauge #s 1-10 Module 7. Gauge #s 1-10 Module 8. Enrichment. Activity 1. Solve Me #s 1-3	**March 28, 2022**

Quarter III Week *7 Key Concepts of Buying and Selling* **March 28- April 1, 2022** ✓ Differentiate profit from loss (ABM_BM11BS-Ii-6) ✓ Illustrate how profit is obtained and how to avoid loss in a given transaction (ABM_BM11BS-Ii-7)	**Worksheet for Week 7 (Reference Activity Sheet Quarter III)** Instructions: Answer the following activities Module 9. Explore #s 1-5 Module 10. Gauge #S 1-10	**April 4, 2022**
Quarter III Week *8 Key Concepts of Buying and Selling* **April 4-8, 2022** ✓ Determine the break-even point ✓ Solve problems involving buying and selling products (ABM_BM11BS-Ij-9)	**Worksheet for Week 8 (Reference: Activity Sheet Quarter 1II)** Instructions: Answer the following activities Module 11. Explore. Activity 1. Is it a Fact or a Bluff?	**April 11, 2022**
Quarter III Week 9 Key Concepts of Buying and Selling **April 11-13, 2022** ✓ Compute interest specifically as applied to mortgage, amortization and on services/ utilities and on deposits and loans	**Worksheet for Week 8 (Reference: Activity Sheet Quarter 1II)** Instructions: Answer the following activities Module 13. Gauge # 1-15	**April 18, 2022**
