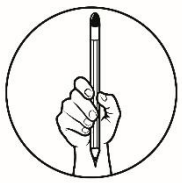
What I Need to Know

This module was designed and written with you in mind. The scope of this module permits it to be used in many different learning situations. The language used recognizes the diverse vocabulary level of students. The lessons are arranged to follow the standard sequence of the course.

After going through this module, you are expected to:

1. identify industries that employs animators;
2. enumerate products and services that an animation studio can offer;
3. know how to identify customer's profile;
4. make use of consumer analysis to identify customer's needs and wants; and
5. conduct consumer/market analysis.



What I Know

Directions: Read each question/statement carefully and answer by writing the letter that corresponds to your choice on a separate sheet of paper.

1. It is the animation industry that uses animation in creation presentations for discussing theories and concepts.
   a. Game Development
   b. Modelling and Simulation
   c. Education and Training
   d. Architecture and Engineering

2. Which industry uses animation to imitate real-life settings for observation and experimentation?
   a. Game Development
   b. Modelling and Simulation
   c. Education and Training
   d. Architecture and Engineering

3. Which industry uses animation for designing building and creating product prototypes?
   a. Education and Training
   b. Game Development
   c. Architecture and Engineering
   d. Modelling and Simulation

4. What animation products commonly used for business meetings and marketing presentations
   a. Explainer Videos
   b. Educational Videos
   c. Animated Logo Design
   d. Animated Illustrations

5. It refers to the animation services that uses a process of manipulating and enhancing images and video to create actions that are impossible or too expensive to shoot with live action.
   a. Character Design
   c. Optical Illusion

b. Visual Effects d. Graphic Manipulation

6. Which of these items is considered as WANTS?
   a. Earrings b. Shoes c. Undergarment d. Pants

7. It is the document that contains the characteristics of your customers
   a. Customer Profile c. Customer Data
   b. Customer Analysis d. Customer Demand

8. It refers to the statistical or numerical characteristics of your customer.
   a. Demographics b. Graphics c. Analytics d. Statistics

9. A strategy used by business owners in collecting relevant information about the customers and analyze them to provide products and services that are essential to consumers.
   a. Customer Profile c. Customer Data
   b. Customer Analysis d. Customer Demand

10. **All of these are need, except:**
    a. Home b. Food c. Clothing d. Automobile

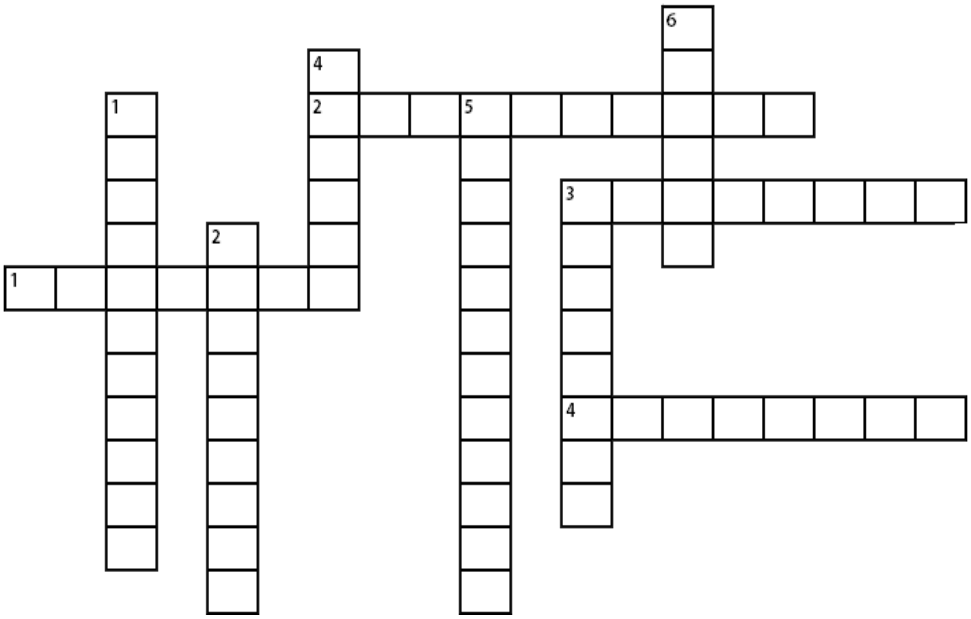
Lesson 1 Environment and Market

The animation industry is one of the fastest-growing enterprises in the world today because of the various fields that consume its products. Its popularity has reached greater heights due to the growing demands of its services and applications. With the help of customer analysis, companies will be able to provide products and services that matches the demands of its consumers.

What's In

CROSSWORD PUZZLE

Solve the puzzle by answering the questions below and putting the letters of your answers to their appropriate boxes.



ACROSS	DOWN
1. Skill that focuses on the ability to portray objects or sceneries using illustrations. 2. The capacity to produce artistic, unique, and innovative outputs. 3. _____ and Composure 4. The characteristics of maintaining calm and composed even in stressful situations. 5. Friendliness and _____ 6. The characteristic that displays the person's pleasant and cooperative attitude towards administrators and co-workers.	1. the characteristic displayed through an individual's sense of responsibility and consistency in accomplishing the assigned tasks. 2. It refers to the routines that a person practices as a way of living. 3. The proficiency in operating with different computer technologies 4. The ability to portray different character personalities. 5. It refers to a person's ability to make necessary adjustments in his/her work setting or environment to fit to the current situation. 6. It refers to the personal ability to perform an action.

What's New

DO YOU KNOW WHAT I AM THINKING?

This activity is done by pairs, find someone in your household with whom you can perform this activity. In this game, you will ask your partner to make a list of the top 10 things based on a category you will provide. On the other hand, you will try to guess your partner's response by writing your guesses on a separate sheet of paper. After your partner finishes answering your question, you then compare it to your guesses. Your goal is to guess your partner's answers to each question accurately.

- 10 fruits that you love to eat.
- 10 favorite cartoon characters
- 10 items that you want to receive in your birthday

Answer the following questions:

1. Of the 30 items that your partner has provided, how many of your guesses were accurate? _____

2. What is your basis for your guesses?

_____

_____

_____

3. Do you think that knowing more information about partner helped you in providing your correct guesses?

_____

_____

_____

Explanation:

The categories that were given in this activity require answers that are personal information about your partner. The more you know about your partner, the higher the chance that your guesses for this activity are accurate. The same logic applies to entrepreneurs and their customers. The more information they know about their consumers, the higher the probability that their products will match the demands of their market.

What is It

UNDERSTANDING THE MARKET IN ANIMATION

The animation industry is continuously being shaped by animation and market.

Environment

The environment refers to all factors that affects a business or an industry. It can include government policies and regulations, business competitors, products, and goods available etc.

Market
The market refers to the customers and potential buyers of the product or services that the business is selling and marketing.

Industries that Employs Animation

Movie and Television
The most popular use of animation is the production of cartoons for film and television. Popular animation series like SpongeBob Squarepants and The Simpsons are broadcasted on television and simultaneously, films like Aladdin, Frozen, and Toy Story are full-length movies that are shown in cinemas.

Modelling and Simulations
Scientific and educational communities use animation to produce virtual environments that imitate actual objects and settings like a jungle, volcano, or outer space. With the help of animation, researchers can manipulate virtual environments to analyze scenarios like earthquakes and typhoons. Experiences like driving a car, flying an airplane, or diving into the deep sea, can also be simulated using animation to lessen the cost and risk involved in performing such tasks in the actual scenario.

Education and Training
Schools and academic institutions are also among the major consumers of animation products, especially in this digital era, where almost every classroom has television or multimedia projectors. Lessons are discussed using graphical and animated presentations intended to promote better understanding.

Architecture and Engineering
Architects and Engineers also use animation in creating 2D or 3D models for their building designs and product prototypes. Using animation software, they can create accurate representations of their proposed designs that allow their clients to see the products before the actual construction.

Game Development
The gaming industry also employs animators' expertise in bringing realistic scenes in the development of their games. The character, its movements and the materials in the environment are all products of animation.

ANIMATION STUDIO PRODUCTS AND SERVICES

As an aspiring animator, you need to learn the products and services that are offered by animation studios. It will serve as a guide on what particular skills you must develop to create these products that are in-demand by different industries. Here are some of the products and services that an animation studio can offer:

Character Designing
Character designing creates an opportunity for animators to develop their characters for books, comic books, games, or movies. An animator assigned to this type of task should be creative and imaginative to design original and exciting characters.

Explainer Videos

Explainer Videos are short animated videos that are commonly used for business meetings and marketing presentations. It contains text and graphics that are animated as a presentation used to discuss a business idea or introduce a new product for the company.

Visual Effects Services
Visual effects refer to manipulating and enhancing images and videos to create actions that are impossible or too expensive to shoot with live-action. Film industry giants Walt Disney Pictures, Warner Bros., and Universal Studios are just some of the company that hires hundreds of animators to work as visual effects team in single movie production.

Educational Videos
It refers to tutorial videos that are used to present lectures more creatively and entertainingly. Instructional videos are commonly embedded in websites or social media platforms to promote self-learning and distance learning.

Animated Illustrations
Publishing companies and advertising agencies require services from animators in creating drawings for their books, magazines, product labels, and advertisement materials.

RECOGNIZING THE POTENTIAL CUSTOMER/MARKET

Identifying Customer's Profile

Imagine setting up a sari-sari store in your neighborhood, with a capital of Php 5,000.00 will it be challenging to decide on what products are you going to sell to your customers? Are you up to the challenge? Create a list of 10 products that you will put in your store.

TOP 10 Products

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Is the list easy to create? Are you sure that all the products that you have listed are of high demand from your customers? What is the basis of your list?

There is an easier way of making this list, and that is through identifying customer profiles. The **customer profile** is a document that lists the characteristics of your customers. This data will help you understand what products to sell by gaining an understanding of your customers.

One important key in knowing your customer is through their demographics. The **demographics** is the statistical or numerical characteristics of your customer. One good example is determining gender. How many females are in your neighborhood? How many are males?

The knowledge of the number of males and females will give you a clue on what to sell. If there are more females than males in your neighborhood, this informs you to stock more products for females since they are the majority of your customers. How about the ages of your neighbors?

Ways of Getting Customer Profiles

1. **Interview**
   One way of getting information is by having an interview with your customers asking for their preferences about the products they want to buy and their expectations. The interview can be done face-to-face or via phone call.

2. **Survey**
   You can also gather information from your customers by asking them to answer a short survey. A questionnaire must be prepared beforehand, which contains questions that, when answered, will show relevant information about their age, sex, economic status, etc.

The customer's intention in purchasing or availing a particular product or service is based on how they perceive the necessity of these objects to their lives.

Needs refers to things that are essential to living. These are objects required by our bodies to survive like food, water, clothing, and shelter. On the other hand, **wants** refer to things that we can live without but satisfy personal desires like cars, jewelries, flat screen television, etc.

Identifying Customer's Needs and Wants Using Consumer Analysis

Consumer analysis is a strategy used by business owners in collecting relevant information about the customers and analyze them to provide products and services that are essential to consumers.

Steps Involved in Consumer Analysis

STEP 1. Identifying the Customers
Using interviews or surveys, the business owners will have a clear picture of who their customers are. The information gathered in this step is helpful in deciding what products or services to offer to clients.

STEP 2. Understanding the Customer's Needs
Aside from customer's profiles, entrepreneurs should also determine the customer's reasons behind their customer's purchases, their basis or preferences of buying a particular product or brand, and the frequency of purchasing these products. The information gathered in this step is helpful in meeting the expectations of their customers.

STEP 3. Show how the Products/Services Meets the Customers' Needs
Now that the business owner has all the information they need about the customer, it is time to develop and market products and services in such a way that it matches the needs and expectations of the customers about the products.

What's More

Activity 1. Conducting a Mini Survey

Directions: Imagine that you are an animator and is looking to create a new animation project. You are tasked to conduct a mini-survey involving 5 respondents. Use a different sheet of paper for your survey.

ANIMATION SURVEY	
Name:	
Age:	◻ 5-8 ◻ 9-12 ◻ 13-16 ◻ 17-20 ◻ 21 and Up
Hours Spent on Watching Cartoons:	◻ 0-2 ◻ 3-5 ◻ 6-8 ◻ 9-11 ◻ 12-14 ◻ 15 and up
Cartoon Genre:	◻ Comedy ◻ Action ◻ Drama ◻ Horror/Mystery ◻ Fantasy ◻ Sports ◻ Musical ◻ Science Fiction
Animation Type:	◻ Hand Drawn Animation ◻ 2D Animation ◻ 3D Animation
Gender of Lead Role:	◻ Male ◻ Female ◻ Others

Activity 2. Graphing and Results Analysis

Using the graph below, tabulate the data that you have obtained from the survey.

5					
4					
3					
2					
1					
	5-8	9-12	13-16	17-20	21-Up

Age Range

What is the age of most of your respondents? _____

What age range gained the least from your respondents? _____

Do you think it is advisable to create an animation project for the age range that garnered the least responses? Explain your answer.

_____
_____
_____
_____
_____

5			
4			
3			
2			
1			
	Hand Drawn Animation	2D Animation	3D Animation

Types of Animation

What type of animation does your respondents watch? _____

Based on the data, what animation type do you think is advantageous to work on? Explain

_____
_____
_____
_____

5						
4						
3						
2						
1						
	0-2	3-5	6-8	9-11	12-14	15-Up

Hours Spent on Watching Cartoons

How many hours do most of your respondents watch cartoons? _____

What have you learned from the data?

_____

_____

_____

_____

_____

5								
4								
3								
2								
1								
	Comedy	Action	Drama	Horror	Fantasy	Sports	Musical	Sci-fi

Anime Genre

What genre of cartoon do most of your respondents watch? _____

What genre of cartoon do least of your respondents watch? _____

What have you learned from the data?

_____

_____

_____

What I Have Learned

1. What are the industries that employs animation?

   _____

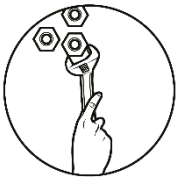
   _____

2. What are the products/services of animation?

   _____

   _____

3. What are the two ways of getting information from your customers?



What I Can Do

Activity 3. Market Analysis

Directions: The table below have a list of businesses that are commonly established in communities. Write the positive and negative aspects of handling the mentioned businesses.

Businesses	Positive Aspects	Negative Aspects
Hardware Store		
School Supplies Store		
Canteen		

Assessment

I. Identification:

With the use of the word bank below, identify what is being asked in each number. Write your answer on a separate sheet of paper.

1. Is a document that lists the characteristics of your customers.
2. A method of getting information from customers by answering questionnaires.
3. Videos that are used to present lectures more creatively and entertainingly.
4. It refers to things that are essential to living.
5. The customers and potential buyers of the product or services.
6. Is the statistical or numerical characteristics of your customer.
7. A method of getting information from customers by having a personal or phone conversation with the customers.
8. The process of manipulating and enhancing images and videos in creating actions that are impossible or too expensive to shoot with live action.
9. Is a strategy used by business owners in collecting relevant information about the customers and analyze them to provide products and services that are essential to consumers.
10. It refers to all factors that affects a business or an industry.
11. It refers to things that we can live without but satisfy personal desires.
12. Are short animated videos that are commonly used for business meetings and marketing presentations.

WORD BANK

Explainer Videos	Educational Videos	Visual Effects
Needs	Wants	Demographics
Environment	Market	Customer Profile
Interview	Survey	Consumer Analysis

Additional Activities

ACTIVITY 4. MY ANIMATION CAREER

Write a short narrative about how you see your career as an animator ten years from now. You can perform this task by giving your insights about the industry (television, gaming, simulations, etc.) that you think you will be mainly working, your dream animation projects, and the accomplishments that will mark you as a successful animator. Provide a title for your essay.

Answer Key

What I Know

1. C
2. B
3. C
4. A
5. B
6. A
7. A
8. A
9. B
10. D

Assessment

1. Customer Profile
2. Survey
3. Educational Videos
4. Needs
5. Market
6. Demographics
7. Interview
8. Visual Effects
